

Designed for a single operator, the new "Solo" marine radio headset station allows monitor and transmit on two radios along with the ability to listen to a stereo background source, such as music. The music source will auto-mute in the event of radio traffic.

- Corrosion and weather resistant
- Simplified operation and installation
- Monitor/Transmit on two radios
- Split Audio L/R
- Stereo Aux Input (mates to radio tx/rx)
- Cell phone capable with use of U9811BS Body Switch and appropriate adapter cord

**Headset Choices:**

**H9842**

- Both behind-the-head and over-the-head styles
- Low tension headband assemblies
- Provide optimum noise attenuation. 23 dB NRR
- Stainless steel hardware to prevent corrosion
- Weather-tight connectors for increased reliability
- Undercut gel ear seals for maximum comfort
- Noise-cancelling, water-resistant microphones
- Rotating boom assemblies allow easy left or right side microphone placement
- Dual volume control for left and right side adjustment
- Black domes available (H9842BK)
- Throat Mic version available (H9842TM)

**H9832**

**Body Switch, Push To-Talk**

**U9810 BS**

- Weather-tight RFI shielded enclosure for increased reliability
- Heavy duty coil cord, 5' extended
- Large, durable, push-to-talk switch
- Belt clip with 360 degree rotation
- Alternate Model: U9811BS (Cell phone capable)

# SOLO Dual Radio Headset Station

## Model Numbers and Ordering Information

Headset Station	U9840	1 required
