Connecting your system

1 Monitor/TV*

!
For best performance it is recommended to use a 1080P monitor/TV and set the DVR's output resolution to 1920x1080. See the instruction manual for details.

2 Mouse

3 Router*

4 Cameras**

Extension Cable*
The extension cable must be a single stretch of cable between the DVR and camera. You cannot connect multiple extension cables to each other.

5 Power

6: ON   VGA*   OR   HDMI

This system features automatic firmware upgrades for enhanced functionality. **It is required to upgrade your system to the latest firmware version.**

If a firmware upgrade is available:

1. After startup, a notification will appear asking you to upgrade the firmware. Click **OK** to upgrade.
2. The system will download and install the firmware upgrade. Wait for the firmware update to complete. The system may restart during the firmware upgrade process.
DO NOT power off or disconnect the power cable during firmware installation.

8 channel configuration shown. 4/16 channel will have the respective number of video inputs.

**Cameras not included. This system supports analog and FLIR MPX cameras. Extension cables and power adapters for cameras are not included.
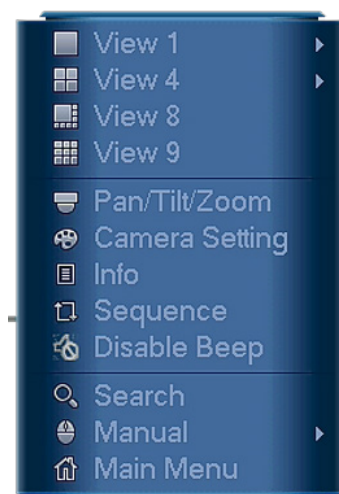

*Not included.

Using the mouse

1. **Left-click:**
   • Click to open the Navigation Bar. Right-click to close the Navigation Bar.
   • **During split-screen display mode:** Double-click an individual channel to view it in full-screen. Double-click again to return to the split-screen display mode.
   • **While navigating menus:** Click to open a menu option.
2. **Right-click:**
   • **During live view:** Right-click anywhere on the screen to open the Quick Menu.
   • **Within system menus:** Right-click to exit menus.

Using the Quick Menu

Right-click to open the Quick Menu.

Main Menu	

— Select camera/live display view

— Control PTZ cameras (not included)
— Adjust color settings
— View system information
— Start/stop sequence mode
— Disable beeping alarms
— Search and playback recordings
— Open manual recording controls
— Open Main Menu

⚠️

If the system is beeping after startup, the Ethernet cable may not be connected or the system may not be connected to the Internet.
To stop the beeping:
a) Connect an Ethernet cable from the system to your router and restart the system. **OR**
b) Right click and click **Disable Beep**.

Setting the date and time

1. In live view, right-click and click **Main Menu**.

2. Log in using the system user name (default: **admin**) and password (default: **000000**).

☑ NTP
Server IP: pool.ntp.org Manual Update
Port: 123
Interval: 24 min.

Default   OK   Cancel   Apply

Enter the current time and select your time zone, and click **OK**

Check **DST** to enable auto Daylight Savings Time updates

(Optional) Check **NTP** to sync your system with an Internet time server. Click **Manual Update** to instantly update the time

NOTE: A constant Internet connection is required to use NTP

5. Click **Apply** to save changes.

It is important to set the correct time to ensure accurate time stamps on video recordings.

Playback and search

1. From live view, right-click and then click **Search**.

2. Log in using the system user name (default: **admin**) and password (default: **000000**).

3. Use the calendar on the right to select the date to playback.

4. Use the drop-down menus to select the channels you would like to playback. Click the display options ([▢] [▦]) to playback multiple channels simultaneously.

5. Click inside the video bar to select the playback time. Playback starts immediately at the selected time.
