# Quick Mobile Guide

STOP Before You Start:

- Make sure you have a router and high-speed Internet access (not included).
- Connect your NVR to your router using an Ethernet cable (see the Quick Connection Guide for details).
- Upgrade your NVR firmware and client software or mobile app to the latest versions.
- Please note that an upload speed of 1Mbps is required for remote video streaming. Up to 3 devices may connect to the system at the same time.

1A iPhone

a Install the free **FLIR Cloud™** app from the App Store. Tap the **FLIR Cloud™** icon to open the app.

b Tap **Sign up** and enter your email address and password to create a new account.

c

Live View	→	Device List +

Tap — Then tap +

d Configure the following:

EXAMPLE

① Tap **Scan QR Code** and line up the QR code on the top of the NVR using the camera on your iPhone.

Device ID: xxxxxxxxxxx

OR under **Device ID**, manually enter the Device ID printed on the label.

	Scan QR Code	>
	Register Mode:	Device ID >
②	Name:	HD System
	Device ID:	Inv89c122be3
③	Client Port:	35000
④	Username:	admin
⑤	Password:	•••••
	Live View:	Sub >
	Playback:	Sub >

CONNECT

② **Name:** Choose a name for your system of your choice.
③ **Client Port:** Enter the **Client Port** (default: **35000**).
④ **Username:** Enter the **NVR's User Name** (default: **admin**).
⑤ **Password:** Enter the **NVR's Password** (default: **000000**).
e Tap **Connect**. You will be prompted to change the NVR password.

f Enter a new 6 character password and tap **OK**. This password will be used to log on to your system from now on.

g The app opens in Live View and streams video from all connected cameras.
1B iPad

a Install the free **FLIR Cloud™** app from the App Store. Tap the **FLIR Cloud™** icon to open the app.

b [toolbar icons]

Tap — Then tap

c Tap **Add**.

Device Manager	Add

d Configure the following:

EXAMPLE

① Tap **Start Scanning** and line up the QR code on the top of the NVR using the camera on your iPad.

Device ID: xxxxxxxxxxx

OR under **Device ID**, manually enter the Device ID printed on the label.

Setting	Cancel	New Device
Device Manage

3 Connecting on PC or Mac

**a** Download and install the client software.

- **PC Users:** Download and install the **Client Software for PC** from flir.com/security/support.

- **Mac Users:** Download and install the **Client Software for Mac** from flir.com/security/support. Double click to extract the software. Then, drag the software to **Applications**.

b Once installation is finished, double-click the **FLIR Cloud Client™ icon ( )** on the desktop or Applications list.

c Log into the Client Software using the Client Software user name (default: **admin**) and password (default: **admin**) and then click **Login**.

User Name: **admin**
Password: **admin**

d Devices Found

Click **Add Device**

e Enter the following information:

1. **Device Name:** Choose a name for your system of your choice.
2. **Device ID:** Manually enter the **Device ID** printed on the label.
3. **Client Port:** Enter the **Client Port** (default: **35000**).
4. **User Name:** Enter the **NVR's User Name** (default: **admin**).
5. **Password:** Enter the **NVR's Password** (default: **000000**).

EXAMPLE

Add Device

Click **Add**

f You will be prompted to change the NVR password. Click **OK**.

g Enter a new 6 character password and tap **OK**. This password will be used to connect to your system from now on.

h Click [ADD] then [LIVE VIEW].

i Click and drag **Default Group** to the display window to open your cameras in live view.

Congratulations! You can now connect over the Internet to view and playback video on your computer.
