# INSTALLATION INSTRUCTIONS

**Product Revision** 7160-0190 Rev. A DS-52 UNDERBODY SUPPORT

The DS-52 Underbody Support plate is designed to provide greater stability to the DS-52 and to distribute the clamping load across the vehicle body.

### Hardware

The DS-52 Underbody Support plate is supplied with the following hardware:

- 1. 4 ea. 3/8x2.00 UNC zinc coated tap bolt
- 2. 4 ea. 3/8 UNC zinc coated jam nut
- 3. 4 ea. 3/8 UNC zinc coated nylon lock nut
- 4. 4 ea. 3/8 zinc coated spring lock washer
- 5. 8 ea. 3/8 zinc coated flat washer

## Tools Required

Installation of the DS-52 Underbody Support plate will use the following tools:

- 1. 9/16 wrench
- 2. A 10-in piece of twine

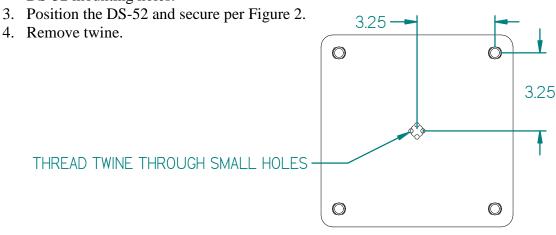

### Installation

Caution: Before drilling holes through a vehicle floor pan inspect the drill locations for wiring, exhaust pipes, drive train components, fuel lines, and hydraulic lines.

The DS-52 Underbody Support plate can be installed in two configurations: 1) Bolts with threads down, or 2) Bolts with thread up.

### **Bolts with Thread Down**

- 1. After the holes have been drilled for the DS-52 Base drill one additional hole in the floor pan at the center of the hole pattern. (Figure 1)
- 2. Thread twine through two small center holes in the DS-52 Underbody Support plate and secure the plate in position with the four PEM fasteners aligned with the DS-52 mounting holes.
