Form

INST-438

The Dell E-6400 and E-6400 ATG cradle allows a Dell E-Port or E-Port Plus port replicator and Dell E 6400 or 6400 ATG computer to be used in a mobile application.

Tools Needed

#2 Philips screw driver

11/32 box wrench

5/32 hex-key wrench

Mounting the Port Replicator

1. Open hardware bag 7120-0468 with the port replicator mounting hardware.
2. Position the port replicator using the bent tabs on the deck of the cradle as guides.
3. Secure lower section of the replicator using the left and right lower mounting brackets and (2) #8-32 x .38 machine screws.
4. Ensure the angle of the upper tab on the lower brackets is parallel with the angle of the port replicator.
5. Secure the rear of replicator using the left and right rear support brackets and (4) #8 flat washers with (4) #8 nylon lock nuts.
6. Ensure the left and right rear support brackets do not block any replicator ports.
7. Twist the 4 vinyl caps onto the unused threaded studs.

Adjusting the Side Brackets

1. After the port replicator has been installed open the cradle by pushing the latch button and pulling the sides outward.
2. Mount the computer onto the port replicator. A secure mount is confirmed with an audible click of the Dell port replicator.
3. Loosen the side hooks using the 5/32 hex-key wrench.
4. Close the cradle and align the left and right side hooks.
5. Secure the left and right side hooks and computer using the 5/32 hex-key wrench.
